

April 7, 2016

Dear Mrs. Howard,

I would like to thank you and Kiawah Cares for your assistance in getting Cathedral High School's Mission group to Frierson Elementary School of Technology. They were able to assist us with assembling the Green House that your organization donated along with many other projects. Without your support and dedication to our school this would not have been possible. Our garden and outdoor classroom initiative is off to a great start because of your organization.

**Edith L. Frierson Elementary
School of Technology**

Gerrita Postlewait, Ed.D.
Superintendent of Schools

Terri Nichols
Associate Superintendent

Kimberly Davis
Principal

The purpose of the E.L. Frierson Gardening and Outdoor Classroom Project is to encourage environmental literacy by connecting our students with the natural world and develop an understanding of the true source of their food and teach valuable gardening and agriculture concepts. This initiative will also teach students personal and social responsibility.

We are so excited about the learning that is taking place here on Wadmalaw Island! The assistance of citizens like you and Kiawah Cares have enabled us to accomplish far more than we could have ever imagined. On behalf of our students, parents, and school staff at Frierson Elementary School of Technology, I thank you again.

Professionally yours,

Mrs. Kimberly Davis, Principal
Frierson Elementary School of Technology
